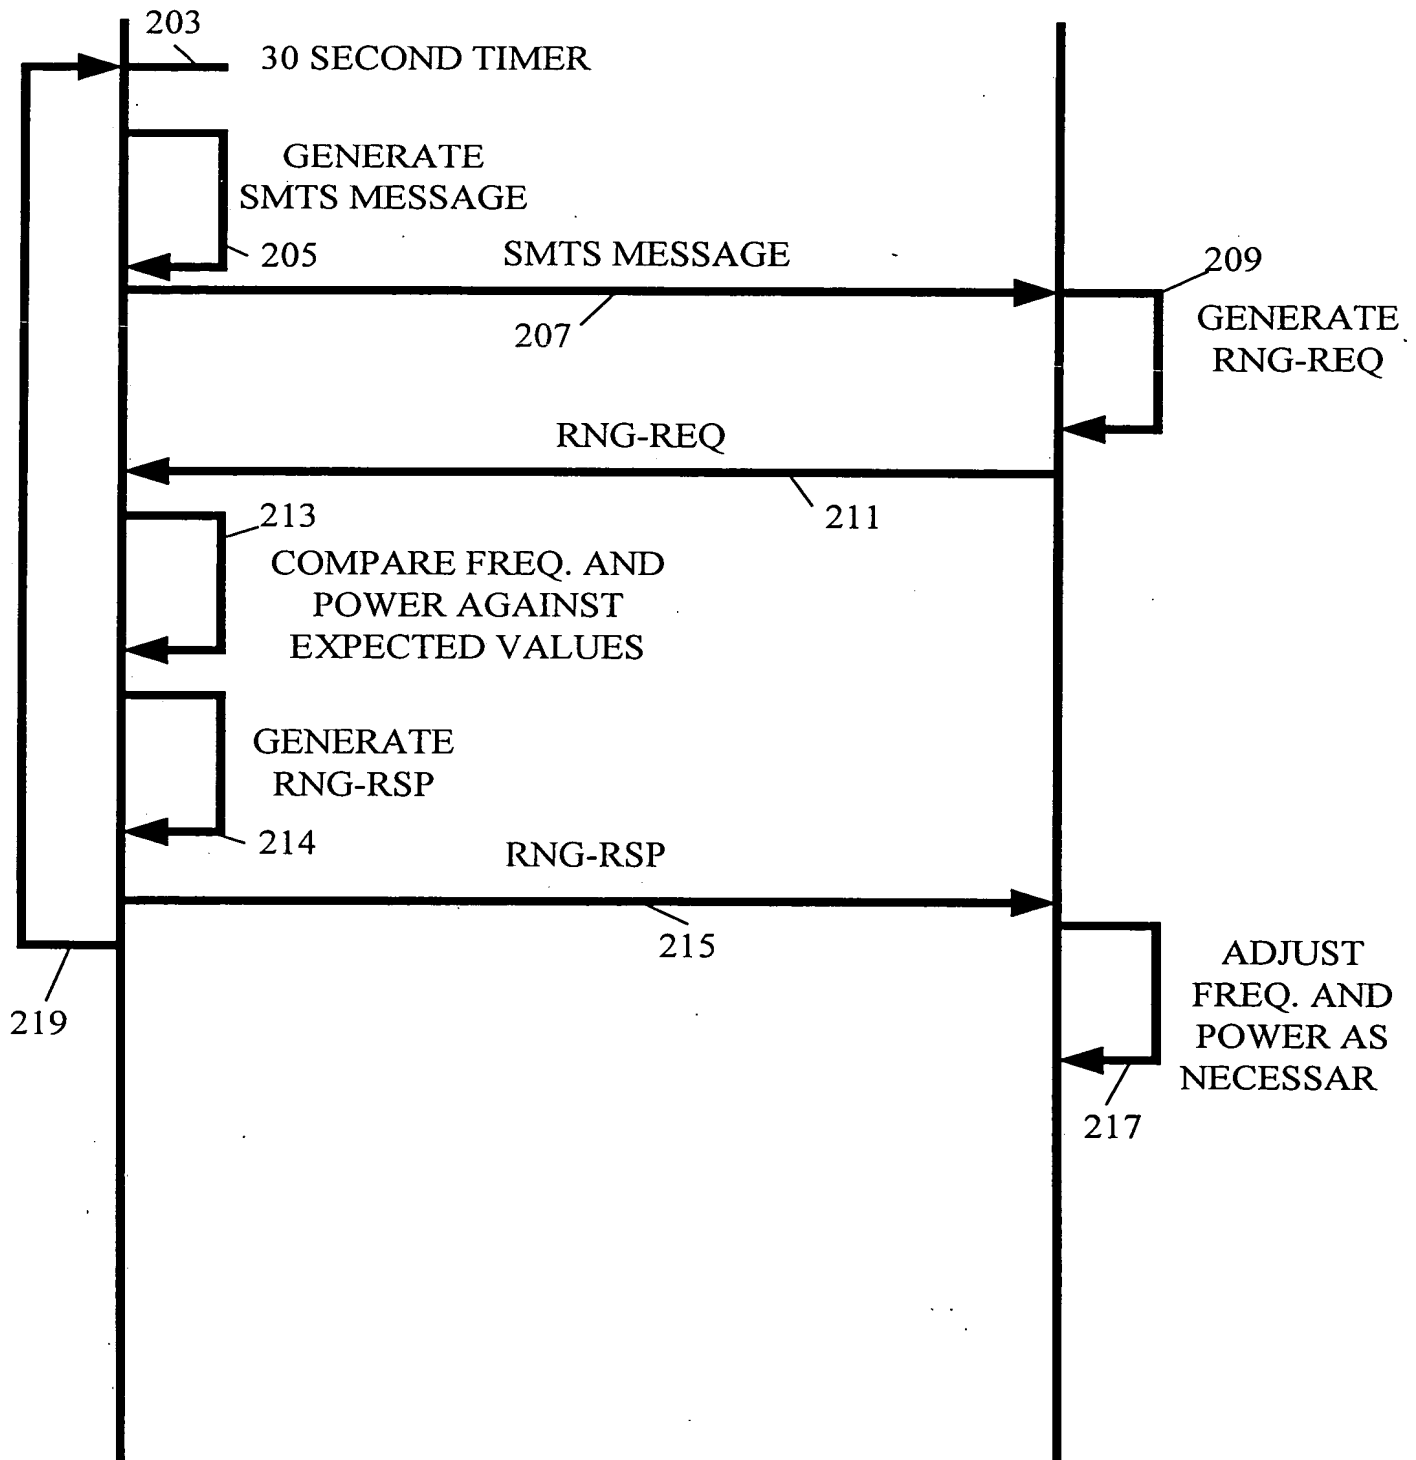

Figure 2

Figure 1 is a line graph showing the relationship between dBmV (Y-axis) and msec (X-axis) for a 302 Hz tone. The Y-axis ranges from -2.00 to 3.00 dBmV, and the X-axis ranges from 10 to 60 msec. The graph shows a series of data points connected by lines, illustrating the change in dBmV as msec increases. The data points are approximately: (10, 2.5), (15, 2.8), (20, 3.0), (30, 2.5), (40, 1.5), (50, 1.0), (60, 0.5).

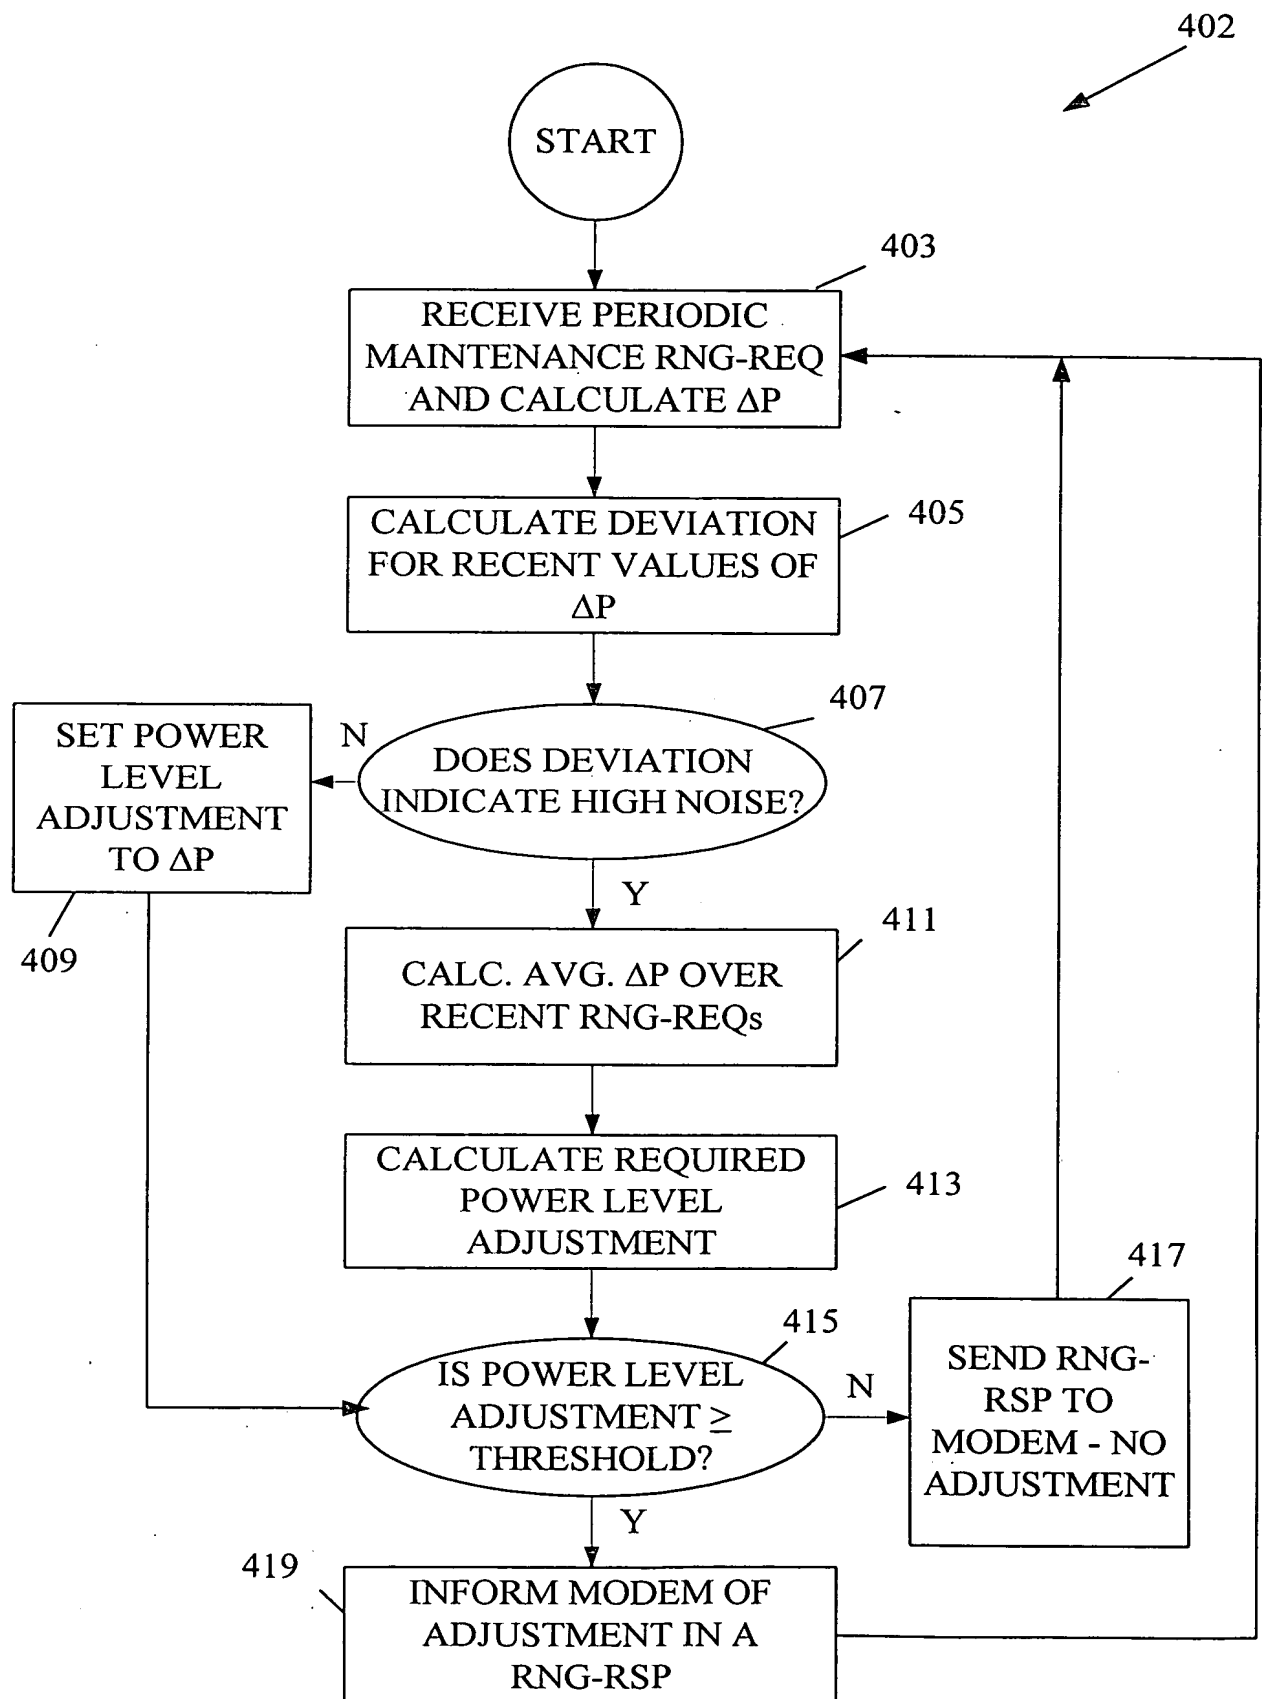

Figure 4

503

Signal/Noise	Power Level Adjustment
24.00 dB	0 dBmV
23.24 dB	- 0.5 dBmV
21.74 dB	- 1.5 dBmV
20.38 dB	- 2.4 dBmV
19.17 dB	- 3.2 dBmV
18.11 dB	- 3.9 dBmV
17.21 dB	- 4.5 dBmV
16.45 dB	- 5.0 dBmV
16.00 dB	- 5.3 dBmV
